WORK EXPERIENCE

Data & Software Engineer Co-op

January 2025 – December 2025

Samsung R&D

Vancouver, BC

- **Designed and deployed** a privacy compliance data pipeline ingesting thousands of delete and access request tickets per day and joining against internal mapping tables to generate de-identified reporting datasets
- **Implemented and productionized** a conformed data model built on **billions of total records in core Samsung Health logging tables**, enabling daily enrichment workflows consumed by global analytics stakeholders
- **Developed** data generators for **133+ tables** to simulate production workloads and validate ETL transformations in development environments
- **Reduced manual analysis** of raw ticket data by enabling Tableau dashboards and queryable reporting tables, improving visibility into processing timelines and regulatory compliance metrics

Director of Technology

October 2024 - Present

SFU Open Source Development Club

Burnaby, BC

- **Oversaw technical direction** of student-led software projects, mentoring developers on architecture, Git workflows, and documentation practices
- **Structured onboarding processes** and technical documentation standards to improve project continuity and collaboration

PROJECTS

HavenView — Write-up | *FastAPI, WebRTC, Docker, PostgreSQL, Redis, Cloudflare*

January 2026

- **Engineered** a privacy-first home security system deployed on Raspberry Pi and later migrated to a dedicated Ubuntu Linux server for improved reliability
- **Integrated ONVIF IP cameras** with real-time WebRTC streaming and Redis-backed event buffering for motion-triggered recording
- **Implemented automated retention and LAN-first architecture** with configurable cleanup jobs and secure remote access via Cloudflare Tunnel

Mealpository — mealpository.com | *Angular, Django, AWS, Terraform*

October 2025

- **Designed and deployed** a cloud-native full-stack app on AWS using ECS Fargate, RDS, S3, ALB, and CloudFront
- **Implemented JWT authentication** with Django REST Framework and role-based access control
- **Provisioned infrastructure with Terraform**, enabling autoscaling, health checks, logging, and firewall configuration
- **Integrated OCR + LLM parsing** (Google Vision API + Llama-3.3-70B) for automated recipe ingestion

EDUCATION

Simon Fraser University

September 2021 – April 2027

Bachelor of Science, Computing Science

Burnaby, BC

- **Relevant Coursework:** Data Structures & Algorithms, Data Science, Software Development Practices, Database Systems, Web Development, Computer Architecture, Computer Networking

CERTIFICATIONS

AWS Certified Solutions Architect – Associate (Amazon Web Services)

TECHNICAL SKILLS

Languages: Python, Java, Scala, TypeScript, SQL

Backend & Data: Django, FastAPI, Spark, Airflow, PostgreSQL

Frontend: React, Angular, Next.js, TailwindCSS

Cloud & DevOps: AWS (ECS/Fargate, RDS, S3, ALB, WAF, CloudFront), Docker, Terraform, Linux, Git
